

## AUTOS COLLIDE IN BLINDING RAIN STORM

Quick Action On Part of  
Charles Young Prevented  
A Serious Accident

Quick action on the part of Charles Young, while driving his automobile Saturday evening during the terrific rain storm, prevented what might have been a serious accident.

Mr. Young, together with his daughter, Miss Ruth, and Miss Irene Trick, was driving on East Vine street and as they turned at Division street the machine collided with an automobile driven by Mr. Tobert Hall, of Bladensburg.

Just as the machines were about to come together, Mr. Young turned his car very quickly, causing the Hall machine to receive only a slight blow. Mr. Everett Mullinix, of Bladensburg, who was riding in the front seat with Mr. Hall, was struck by flying glass and his right hand was badly lacerated. Neither Miss Young nor Miss Trick was injured.

## ENGINEER PREVENTS WRECK ON B. & O.

Large Section of Track Is  
Washed Out Just North of  
Ankenytown, Ohio

Quick action on the part of the engineer on passenger train No. 44 on the Baltimore & Ohio railroad, trainmen say, resulted in averting of what might have been a terrible catastrophe Sunday.

Owing to the terrific rainstorm, the engineer and firemen were unable to see very far ahead and they did not notice that a large section of track had been washed away, one mile and a half north of Ankenytown, until they were less than fifty yards from the washout.

The brakes were applied instantly and the locomotive stopped within a short distance of the gap, which was found to be more than 200 yards long.

In spite of several washouts Sunday morning on the Newark division of the Baltimore & Ohio, caused by the terrific storm, all trains were running on schedule Monday.

Workmen were rushed to the scene of the washout and repaired them as quickly as possible.

## IMPATIENTLY AWAIT GREAT NEW CIRCUS

Ringling Bros. and Barnum  
& Bailey Combined Shows  
Arouse Keen Interest  
In Mt. Vernon

"Circus Day," the big holiday for which young and old impatiently wait at this particular season, promises to eclipse all other events of the calendar year at Columbus, Thursday, July 24.

It would seem as though everybody in this locality were planning to attend. The very name of the great new circus—Ringling Brothers and Barnum & Bailey combined—has been sufficient to arouse far more interest than has ever before been shown in the coming of any amusement enterprise. And word from the Ringling Brothers, who are the directors of this gigantic super-circus, is to the effect that those who attend the performances will witness the greatest program ever presented in America. This is likewise true of the mammoth street parade, which will positively take place showday morning, a mammoth menagerie and all else connected with this biggest of all amusement institutions. The famous showmen have made a complete survey of both the great circuses and merged the finest and best of each into one. Hundreds upon hundreds of performers will appear in the gigantic main tent. There will be scores upon scores of the cleverest dumb actors. A gorgeously costumed pageant, of stupendous size, will open the program. Great companies of characters, representing the best-loved stories of fable and nursery lore, will appear. There will be splendid and many groups of beautiful horses in jeweled trappings. The army of clowns exceed all past records for fun and numbers. All contribute to the biggest circus in history.

## A New Arrival in the Mazda Family

### The National MAZDA C-4 Lamp

Thousands of homes are waiting to welcome this new-comer, for it represents the most important development in home lighting since the very first MAZDA lamp came to show the way to better light. The NATIONAL MAZDA C-4

white glass which conceals the filament, and softens and diffuses the light. It is made in the 50-watt size only.

In appearance the MAZDA C-4 is strikingly different from any lamp now on the market. The bulb is made of white glass of a peculiar opalescence. Instead of being transparent, like the standard lamp, the glass of the gas-filled MAZDA C-4 is seemingly opaque. But when the current passes through the filament, the lamp emits a brilliant yet glareless, soft and ideally-diffused light which is unlike that produced by any other lamp.
